

# Cowbridge Lower School Newsletter

14.3.25

It has been another egg-citing week in Lower School this week!

Nursery have continued to look after their egg, making sure they are following the instructions from Mrs. T. Rex very carefully. They have been practising their number skills by pretending to be dinosaurs and stomping out the correct number of footprints on the card. They have also had great fun making up their own dinosaur adventure stories and thinking about how they feel when they learn something new.

Reception have also been looking after their egg very, very carefully. They have been scientists and carried out an experiment to find out which material will be best for making the baby dinosaur's pants to keep it warm. They have drawn pictures and used adjectives to predict what they think the new baby will look like. And made pants for all the other dinosaurs. They also made maps to help it find its way around Dinoland.

Another egg was left by Mrs. T-Rex and this time Year 1 were lucky enough to find it! They have discussed how they felt finding the egg and written questions to ask the dinosaur inside. They have looked at the work of the palaeontologist, Mary Anning and decided to make volcanoes, fossils and a museum in their classroom. Using dinosaur footprints, they have been able to practise their estimating and measuring skills.

We have also planted our seed potatoes, we are hoping for a bumper harvest again this year for another Lower School feast!
